

THERAPY WORKS

904.348.5511 www.TherapyWorks-Rehab.com

TherapyWorks' Physical & Massage Therapy clinics provide effective physical therapy, neuromuscular therapy, and orthopedic massage treatments designed to alleviate pain, stress, and to rehabilitate individuals from all types of injuries.

Our Programs

We have 3 programs for your individual needs.

Physician Prescribed Program

This program is for people who have been injured in car accidents, at work, playing sports or people who have developed pain or discomfort due to other reasons or underlying conditions. Our therapists will perform a evaluation of your condition and design a treatment plan designed to help you recover quickly and with minimal discomfort. We accept PIP (automobile insurance), workers' compensation, Medicare, Tricare, and many other health insurances.

Private Pay Programs

This program is designed for people who may not have insurance or their insurance may not cover physical medicine or therapeutic massage. It is also for people who want to come in for therapy on their own in order to avoid the hassles of insurance billing. Whether someone needs an exercise or stretching program, deep tissue massage, neuromuscular, sports massage, pre & post natal massage, or relaxation, we can help.

Wellness Membership Programs

This program is excellent for people that would like regular massage therapy services on a long-term basis in order to stay healthy and injury free. The program consists of a monthly membership fee which entitles individuals to 50% off all massage therapy services making it very affordable to anyone's budget. If someone is looking to save money and stay healthy year around, this is the program for them.

Please see reverse side for specific pricing.

Program Rate Information

Physician Prescribed

If your physician has written a prescription for (PT) physical therapy, (NMT) neuromuscular massage therapy, or for both, many insurances will cover your treatment. We accept PIP (auto insurances), workers' compensation, Medicare, Tricare, and many other health insurance plans.

Depending on the specific plan benefits, there may be a copay or deductible due at the time of service. We will call and verify each individuals plan benefits before starting therapy. Billing fees for physical medicine for treating pain and injuries range from 30-45 per 15 minutes of treatment due to the level of service required in treating specific medical conditions diagnosed by a physician.
